

## LEJONKLOU TUNDRA 2 POWER AMPS

Lejonklou Power amps: Tundra 2.5 and Tundra Mono 2.2— clean, simple and, above all, musically engaging amplifiers.

- Designed from the front-end back to retain as much of the musical signal as possible
- The Tundra circuit combines very short signal paths with high speed and high reliability components and customer adjustable power supply trimming circuit
- Components carefully selected for the most musical performance after extensive listening tests plus a unique, 1.1kg pure copper heatsink
- Precise matching of critical components including output transistors
- Dual Switch Mode power supplies in both stereo and Mono units
- Unique, Lejonklou-designed Class A/B output stage
- Their moderate power ratings (Tundra 2.5 - 24W/ch, Tundra Mono 2.2 - 40W, both continuous 8 Ohms) belie their ability to play music with great authority
- Simple, clean all aluminum casework with a hardwearing black speckle finish
- Very reasonably priced at \$4950.00 per unit for the stereo 2.5 or Mono 2.2
